## R Markdown

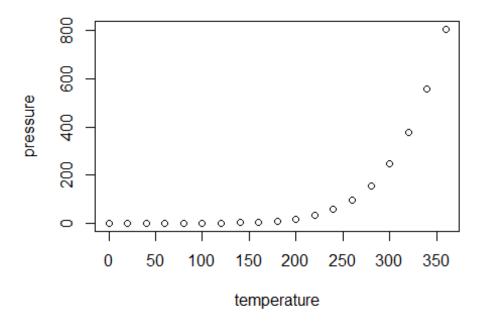

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <a href="http://rmarkdown.rstudio.com">http://rmarkdown.rstudio.com</a>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
##
       speed
                      dist
##
   Min. : 4.0
                 Min. : 2.00
                 1st Qu.: 26.00
##
   1st Qu.:12.0
## Median :15.0
                 Median : 36.00
        :15.4
                      : 42.98
## Mean
                 Mean
## 3rd Qu.:19.0
                 3rd Qu.: 56.00
## Max. :25.0
                 Max. :120.00
```

## **Including Plots**

You can also embed plots, for example:

$$latexf(x; \mu, \sigma^2) = \frac{1}{\sigma\sqrt{2\pi}}e^{-\frac{1}{2}\left(\frac{x-\mu}{\sigma}\right)^2}$$

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
